DECLARATION PURSUANT TO 37 C.F.R. § 1.808

DEPOSIT OF MICROORGANISM

I, Joanne Sloan Lancaster, declare and say that I am the inventor and applicant of the subject matter claimed and described in this application. The cultures listed below and described in this application were deposited on 29 January 2002 in the permanent culture collection of the American Type Culture Collection (ATCC), Manassas, Virginia:

<u>Deposited Material</u>	<u>Accession Number</u>
3E1 1-G9	PTA-4017
4G11 1.C12	PTA-4018

Each of the above cultures has been deposited in accordance with the terms of the Budapest Treaty and under conditions that assure access to the cultures during pendency of the patent application to one determined by the Commissioner to be entitled thereto under 37 C.F.R. 1.14 and 35 U.S.C. 122. All restrictions on the availability of the cultures to the public will be irrevocably removed upon issuance of any patent on the above-identified application. Each of the deposited cultures shall be stored with the care necessary to keep it viable and uncontaminated for a period of at least five years after the most recent request for the deposited culture, for a period of at least 30 years after the date of deposit, or for the enforceable life of the patent, whichever period is longest. If the cultures are lost or destroyed, the cultures will be replaced in the respective depository for the period stated above.

Serial No. 10/506,743
Docket No. X-15450

I further declare that all statements made herein of my knowledge are true; that all statements made on information and belief are believed to be true; that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code; and that such willful false statements may jeopardize the validity of the application or any patent issuing thereon.

Deposited on Behalf of: ElI Lilly & Company

Identification Reference by Depositor:

Patent Deposit Designation

Hybridoma, mouse secreting human IgG1 kappa (from a huMab mouse): 3E1 1-G9	PTA-4017
Hybridoma, mouse secreting human IgG1 kappa (from a huMab mouse): 4G11 1.C12	PTA-4018

The deposits were accompanied by: a scientific description, a proposed taxonomic description indicated above. The deposits were received JANUARY 29, 2002 by this International Depository Authority and have been accepted.

AT YOUR REQUEST: X We will inform you of requests for the strains for 30 years.

The strains will be made available if a patent office signatory to the Budapest Treaty certifies one's right to receive, or if a U.S. Patent is issued citing the strains, and ATCC is instructed by the United States Patent & Trademark Office or the depositor to release said strains.

If the cultures should die or be destroyed during the effective term of the deposit, it shall be your responsibility to replace them with living cultures of the same.

The strains will be maintained for a period of at least 30 years from date of deposit, or five years after the most recent request for a sample, whichever is longer. The United States and many other countries are signatory to the Budapest Treaty.

The viability of the cultures cited above was tested FEBRUARY 1, 2002. On that date, the cultures were viable.

International Depository Authority: American Type Culture Collection, Manassas, VA 20110-2109 USA.
